

Environment & social management measures

NDP I focused on mainstreaming environmental and social safeguards viz., social inclusion, management of natural resources and mitigating environmental impacts. Considering that women in rural households play a significant role in livestock sector by carrying out most of the operations, to enhance women's participation, the focus was to cover more women members and organise new/revived Dairy Cooperative Societies (DCSs) as all-women DCSs. Some of the key activities undertaken included: Trainings on environmental & social management for EIAs, promoting renewable energy like biogas & solar, bio-medical waste management at

semen stations and implementing environment & social action plan prepared to increase social integration and ensure social equity.
